DETAILED ACTION

State of the Claims

Applicants reply dated March 9, 2010 cancels claim 2. All other claims are presented in identical form as in Applicants reply dated August 11, 2009.

Claims 1-3, 5, and 10 have been cancelled by Applicant and no claims have been withdrawn from consideration. Therefore, Claims 4, 6-9 and 11 are pending for prosecution on the merits.

Terminal Disclaimer

The terminal disclaimer filed on March 9, 2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of United States Patent Number 7,217,311 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 4, 6-9 and 11 are allowed.

The following is an examiner's statement of reasons for allowance:

The reasons for indication of allowable subject matter have been previously made of record on pages 13 to 14 of the Official Action dated May 12, 2009 and reiterated on page 5 of the Official Action dated December 8, 2009. Specifically, it was noted that both Hwang and Smalley require inclusion of a surfactant compound in the

Art Unit: 1791

dispersion medium when preparing a carbon nanotube dispersion. As further noted by Applicant, although Hwang teaches a very closely related method for manufacturing a ceramic/nanotube composite powder, the Hwang method does not teach or suggest extended sonication periods between 2 and 10 hours in duration.

It follows that the prior art does not teach or suggest the recited method for fabricating a nanocomposite powder which includes the step of sonicating for a duration between 2 to 10 hours a dispersion which consists of (1) carbon nanotubes, (2) a water soluble salt capable of being formed into a ceramic matrix post calcination, and (3) a dispersion medium which is selected from the group consisting of water, ethanol, nitric acid solution, toluene N,N-dimethylformamide, dichlorocarbene, and thionyl chloride.

Claims 4, and 6-9 all depend from independent claim which has been deemed patentable over the prior art of record for reasons noted above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JASON L. LAZORCIK whose telephone number is (571)272-2217. The examiner can normally be reached on Monday through Friday 8:30 am to 5:00pm.
